Solutions

Sensoyo allows you to manage connected assets. Our engineers have carefully chosen the state-of-the-art technologies to build the IoT platform that helps you connect things quickly, build a data-driven business, generate new insights, and drive actions.

This platform facilitates device communication and management, data storage, and app creation, while adhering to robust security protocols.  
It also empowers you to monitor your assets remotely from a centralized, live dashboard.

## Features ▾

**Increase Performance Visibility**  
**Data Driven Decisions**  
**Increase Efficiency**  
**Stay Informed**

- Track the system health and performance from central dashboard
- Informative dashboards and reports customized to the needs of the customer
